carlyla@uw.edu ♦ 425.563.4500 ♦ Seattle, WA

Experienced in Ruby on Rails and JavaScript based programming with a background in Public Health. Enthusiastic, self-motivated, goal-driven professional who possesses excellent communication skills and work ethic. Passionate about enriching our communities and solving problems through technology and programming!

TECHNICAL PROJECTS

NF Personalized Health

- Currently developing a personalized symptom tracking application for patients with Neurofibromatosis
- Aiming to increase easier communication between providers and patients, provide a platform for consistent monitorization of unusual changes or cafe-au-lait spots over time, and support NF genotype-phenotype research
- Submitting to Children's Tumor Foundation's Neurofibromatosis Hackathon
- Utilizing: Ruby on Rails, JavaScript. React, Reactstrap, PostgreSQL

Simplify Project Managing App

- Developed a project managing application all-inclusive with idea bulletin boards, task boards, and issue tracking great for remote collaboration and providing an environment for accountability and efficiency
- Integrated React Beautiful DND to create interactive drag-n-drop features for greater user flexibility
- Utilized: Ruby on Rails, JavaScript. React, Redux, Reactstrap, Material UI, PostgreSQL
