## TECHNICAL PROJECTS

**NF Personalized Health**
*React, Redux, Ruby on Rails, PostgreSQL*
• Developing a personalized symptom tracking application for patients with Neurofibromatosis
• Aiming for easier communication between providers and patients, a platform for monitoring unusual changes or cafe-au-lait spots over time, and support NF genotype-phenotype research

**Simplize Project Managing App**
*JavaScript, React, Redux, Ruby on Rails, PostgreSQL*
• Built a project managing application all-inclusive with idea bulletin boards, task boards, and issue tracking great for remote collaboration and providing an environment for accountability and efficiency
• Integrated React drag-n-drop library creating interactive features for greater user flexibility
